

SEAOHUN

Southeast Asia One Health University Network

The Southeast Asia One Health University Network (SEAOHUN) links and empowers leading universities in the region to generate social and intellectual capital on the 'One Health' approach. We envision a Southeast Asia free of new, emerging, and re-emerging infectious disease threats.

Infectious diseases such as highly pathogenic avian influenza, rabies, and anthrax threaten human and animal life in Southeast Asia. SEAOHUN improves the ability of universities and the current and future workforce to prevent, detect, and respond to infectious disease threats.

We facilitate joint activities and projects among network members, emphasizing partnerships that cross technical disciplines as well as national borders. We facilitate student and staff exchanges, develop curriculums on One Health related subjects, and strengthen and develop teaching methodologies to build the next generation of health leaders.

SEAOHUN at a glance

**Founded in
2011**

with support from
the U.S. Agency
for International
Development (USAID).

Comprised of
67 universities and
138 faculties in
four Southeast
Asian countries.

Supported **18**
SEAOHUN fellows
mentored by One Health
leaders in 2017–2018.

Established
One Health University
networks in Indonesia,
Malaysia, Thailand
and Vietnam. Program
expanding to Cambodia,
Lao PDR and Myanmar.

Awarded
scholarships to
30 students

for One Health-related Master's
Degree programs in 2016–2019.

About One Health Workforce

The One Health Workforce project is developing a health workforce that can prevent, detect and respond to the threat of infectious diseases around the world. The project is part of the USAID Emerging Pandemic Threats 2 program, which focuses on the cross-sectoral disease surveillance, training and outbreak response.

Teams at the University of Minnesota and Tufts University provide support to two One Health networks: SEAOHUN and the One Health Central and Eastern Africa (OHCEA). With One Health Workforce, these university networks are leveraged to transform their regional health workforce.

The 'One Health' approach acknowledges that the health of humans, animals, and the environment are inextricably linked.

Our national network members and expanded countries

SEAOHUN works in collaboration with universities and faculties in the Southeast Asia region to enhance academic partnerships and One Health workforce capacity building.

SEAOHUN has successfully implemented its mission throughout the past 8 years in Indonesia, Malaysia, Thailand, and Vietnam as the national network members (black on map) and has fostered the establishment of One Health university networks in the expanded countries (light grey) including Cambodia, Lao PDR, and Myanmar with the support of the USAID, the Korea International Cooperation Agency (KOICA), and U.S. Department of State.

Our One Health University Networks (OHUNs) are:

- Indonesia One Health University Network (INDOHUN)
- Malaysia One Health University Network (MyOHUN)
- Thailand One Health University Network (THOHUN)
- Vietnam One Health University Network (VOHUN)

Highlighting our networks

In addition to academia and governments, SEAOHUN partners include:

- Food and Agriculture Organization of United Nations, Regional Office for Asia and the Pacific (FAO-RAP)
- World Organization for Animal Health Sub-Regional Representation for South-East Asia (OIE SRR-SEA)
- PREDICT-2 Indonesia in collaboration with Primate Research Center of Bogor Agricultural University and Eijkman Institute for Molecular Biology
- International Livestock Research Institute (ILRI)
- Thailand Coordinating Unit for One Health (Thai CUOH), Ministry of Public Health (MOPH)
- Agricultural Research for Development (CIRAD)
- Wildlife Conservation Society (WCS)/PREDICT-2 Vietnam
- Center of Antimicrobial Resistance Monitoring in Foodborne Pathogens (CU VET AMR)
- Thailand Ministry of Public Health – United States Centers for Disease Control and Prevention Collaboration (TUC)
- World Bank Group
- Southeast Asian Ministers of Education Organization Tropical Medicine and Public Health Network (SEAMEO TROPMED)
- One Health Central and Eastern Africa (OHCEA)

The factsheet is made possible by the generous support of the American people through the United States Agency for International Development (USAID). The contents are the responsibility of Southeast Asia One Health University Network and its implementing partners and do not necessarily reflect the views of USAID or the United States Government.
